Ecosystem and climate informed advice priorities

- Further **evolve our advice framework for fisheries** to take account of ecosystem and climate change impacts
- Develop **cumulative impact assessment** methods and advice framework.
- Develop **trade-off analysis** methods for ecosystem-informed advice
- Develop **climate-informed advice** products
- Continue to provide and develop **spatially explicit advice** to inform species management, habitat conservation, and restoration plans.
- Draft and publish further **ICES Viewpoints** to address new advisory priorities
- Implement the **Framework for Ecosystem Informed Science and Advice** (FEISA) in targeted advice products
