Work Plan 2026

- Expert Group date suggestions and Advice requester deadlines for advice set the terms for the workplan. ADGs and Web.Confs are then scheduled to fit these two 'end-points'.
- Not a trivial task particularly when trying to avoid to schedule overlapping meetings and allowing for enough time between the expert groups, ADGs and WCs to perform the quality checks and updates and formatting of advice sheets.
- The advice department is increasingly sharing tasks across processes in order to enable the necessary support and management of these – we do not have enough hands, but the sum is larger than the individual parts.
